GRANTHAM BRIDGE REDUCED TO ONE LANE FOR CONSTRUCTION
REPLACEMENT OF NH ROUTE 114 BRIDGE OVER STOCKER BROOK

The New Hampshire Department of Transportation announces the NH Route 114 bridge over Stocker Brook in Grantham will be reduced to one lane of alternating traffic this week to allow work to continue on the bridge replacement project.

The alternating traffic will be controlled by temporary traffic signals.

Neil Daniels Inc. of Ascutney, Vermont is the general contractor for the \$850,000 bridge replacement and road improvement project, which has a scheduled completion date of October 2003.
